

Education Committee

ED Testimony

Please oppose Governor's Bill 7150 Section 1. For 50 years, the state has reimbursed the cost of nonpublic school health services in order to ensure proper nursing care is offered to their students. Proper care is most needed now considering our changing population demographics. Nonpublic students need immunizations and health services more than ever. Elimination of funding jeopardizes their health. Please do not balance the budget on the backs of Catholic Schools and parents. Thank you.

Thank you.
